TO WHOM IT MAY CONCERN

UWILD WORK ASSIGNED: The Scope of Work was to deploy the ROV for the Full inspection of the hull. The blinding of the Low & High Sea chests, Draft Gauge, Boiler Blow down, and I.G overboard apertures by the diver-less under water activities/methods.

TESITIMONIAL

We (Tullow Ghana Limited) have been largely impressed with the professionalism that characterised the overall delivery of the scope by EM & I and its local partner STARK ENERGY. Starting from the pre works, movement of logistics, the fabrication to precision of the LIMPET blind which was 100% fit for purpose when it was mock tested and finally deployed in the field.

The Blinding of the Low and High Sea chest was a huge success in the outstanding UWILD scope, since previous attempts with diving teams did not yield the desired results.

The High Safety standard exhibited from the onset with no incident recorded is highly commendable. The team's desire to overcome every challenge was remarkable since this was a heavily weather dependent scope.

On the whole, it was a very huge success and was A JOB WELL DONE.
